-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 14-27, drawn to an electrical device with a covering film comprising a plastic material and at least one filler material that is different from the plastic material.

Group II, claims 28-33, drawn to a method of producing an electric device by laminating a covering film which comprises a plastic material and at least one filler material that is different from the plastic material.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Although the feature of a covering film comprising a plastic material and at least one filler material different from the plastic material, is common to both Groups, the feature is not novel over the prior art, and thus there is a lack of unity. For example, the reference of **Neu et al. (US 6,469,086)**, cited by Applicant, teaches a cover film for an electronic device wherein the cover film comprises a plastic material and at least one filler material different from the plastic material (col. 4, Ins. 62-67; col. 4, Ins. 17-31).
